

THE ENERGY SMITHS

LIGHTING SOLUTIONS
FOR YOUR BOTTOM LINE

WHAT WE DO

The Energy Smiths are San Diego's LED lighting experts. We offer an engineered solution to energy efficiency, lowering both energy bills and environmental impact with \$0 out of pocket.

What can we do for you?

The Energy Smiths will take you through the energy efficiency upgrade process with ease. We design a custom lighting plan to fit your needs and install the project ourselves. By walking you through every step of the way with transparency and custom designs, we give you huge energy savings for years to come with \$0 out of pocket!

Our mission is to help San Diego business owners save money on monthly lighting bills!

Why invest in LED lighting?

LED Lighting is the current trusted solution to both improve lighting and reduce operation costs. It is extremely cost effective and makes a great impact on a company's carbon footprint.

This type of lighting replaces fluorescent lighting and increase the perceived light levels while reducing the energy consumption by 50% or more. Depending on how many hours lights are turned on, the typical lighting improvement project pays for itself out of lowered electricity bills in 3 years or less.

LED lighting improves occupant comfort, lowers or eliminates maintenance costs, improves employee production, increases property value and security in outdoor applications, and brings a sleek, modern look.

Not in the budget? Try our shared savings program!

The Energy Smiths have savings option that allows for no up-front costs and generates a positive cash flow. This allows you to keep capital and invest in other improvements your property needs, while still seeing cost reductions in monthly lighting bills. We have not recommended a project lower than 20% return on investment, and we regularly develop projects with a 100% or greater ROI. Why not collect the benefits of LED lighting (including monthly cost savings) and pay \$0 up front?

Contact us today!

If you are interested in upgrading to LED lighting reach out to us today!
We will give you a custom quote on costs and savings, and work to make sure you get the best value.
